Average Cost – Uses the average cost of the shares as the basis for redemptions to calculate capital gains and losses. To determine the holding period for the shares, average cost uses the First-In, First-Out method. The Average Cost method is available only for mutual funds.  First-In, First-Out (FIFO) – Shares acquired first in the account are the first shares depleted to determine cost basis.  Last-In, First-Out (LIFO) – Shares acquired last in the account are the first shares depleted to determine cost basis.  High Cost – Shares acquired with the highest cost per share in the account are the first shares depleted to determine cost basis.  Low Cost – Shares acquired with the lowest cost per share in the account are the first shares depleted to determine cost basis.  Specific ID – Shares specifically identified by the shareholder at the time of the sale are sold or redeemed first.
